PROFILE

I'm a Computer Science student from Sfax, Tunisia, who builds and ships technology that solves problems people actually face: a wildfire alert network now finishing testing across Tunisia, an independent software product with paying customers worldwide, and a platform connecting international workers with employers across Europe. Alongside that, I volunteer translating knowledge across language barriers and verifying identity for a financial-inclusion network, and I've spent two years professionally evaluating the quality and cultural accuracy of AI systems used by companies including Meta and Uber. When I see a gap, I bring together the people or the tools to close it.

LEADERSHIP & IMPACT PROJECTS

Himaya: Community Wildfire Safety Network

2026

Tunisia, feature-complete

- Led the design of a citizen wildfire-reporting and volunteer-coordination app that alerts everyone in a fire's path within seconds, built around how people in Tunisia actually use their phones and speak their own dialect, not a generic assumption of either.
- Owned the trust-and-safety rules that make it work without becoming a source of panic or false alarms: how a report gets verified, when the community handles it, and when a moderator has to step in.
- Directed the whole technical build through AI coding agents, holding every product and safety decision personally.

SheetDiff: Independent Software Product

2025 – present

Live, global customers

- Took a product from idea to a live, paying business on the Google Workspace Marketplace, setting the pricing and every product decision along the way.
- Caught and fixed pricing and trust mistakes before they reached a single customer.

Recruitment Platform: Cross-Border Employment

2025 – 2026

Live, client project

- Designed the hiring workflows for a platform connecting international workers with employers across Europe, including the rules that decide who gets a fair, un-biased chance at an interview.

VOLUNTEERING & COMMUNITY

Subtitle Editor

Apr 2024 – Present

TED Translators

Volunteer, Remote

- Translate and subtitle TED Talks into Arabic, making global ideas accessible to Arabic-speaking audiences who would otherwise not reach them.

KYC Validator

Jul 2024 – Present

Pi Network

Volunteer, Remote

- Review identity documents to help extend a trusted financial network responsibly to new users.

PROFESSIONAL EXPERIENCE

Linguistic AI Evaluator (Meta AI)

Nov 2024 – Present

RWS Group

Remote

- Evaluate AI model responses in Arabic for a major technology company, helping make its AI systems fairer and more culturally accurate for Arabic speakers.

Language Data & Quality Reviewer

Jul 2024 – Present

Volga Partners (contracted to Uber)

Remote

- Review AI-generated content and datasets for a global platform used across dozens of countries, flagging quality and fairness issues before they reach real users.

Machine Translation Post-Editor (EN ↔ AR)

Mar 2020 – Present

Unbabel

Freelance, Remote

- Post-edited 1.6M+ words across 8,000+ Arabic–English tasks over five years, improving how millions of words of AI translation actually read to a native speaker.

ACHIEVEMENTS

- Finalist, Abu Dhabi AI Spark Hackathon, top 10 of 25 teams, building a conversational search tool over an open government-data platform in 48 hours.
- Finalist, 1st AI Hackathon in Tunisia, top 10 of 26 teams; led the team that built a career-guidance and job-scam-awareness tool for young jobseekers.
- Built and shipped three independent software products, each now in real-world use.

EDUCATION

Bachelor’s Degree in Computer Science <i>Faculty of Sciences, Sfax</i>	Sep 2024 – Jul 2027 (expected) Sfax, Tunisia
Baccalaureate, Experimental Sciences <i>Secondary High School Feriana</i>	Sep 2020 – Jul 2021 Feriana, Tunisia

LANGUAGES

Arabic (native), English (professional), French (limited), German (elementary)
